System Requirements

Last updated: September 5, 2022

System Requirements

eRequest is a web application and therefore requires a web server onto which it is installed. Clients connect to the web server and use the web pages. The database eRequest uses must be installed on the same SQL server as the Dynamics GP databases.

Web Server Requirements

Windows 2012 Server R2
Windows 2016 Server
Windows 2019 Server
Microsoft Internet Information Server V7.5 or better
Microsoft .NET Framework V4.6.2 (Full Profile) or better
Microsoft System CLR Types for SQL Server 2014 (Installation file is provided in the eRequest Install directory)
Microsoft Report Viewer 2015 Runtime (Installation file in provided in the eRequest Install directory)

N.B. eRequest must **NOT** be installed to the same IIS website as an existing Microsoft Sharepoint or Business Portal installation. It is a standalone Web Application and not part of Sharepoint or Business Portal.

Microsoft Dynamics GP

V11.00 R2 (2010) onwards

N.B. The Multi Bin feature must be turned **OFF** in Inventory

Dynamics GP SQL Server Requirements

Microsoft SQL Server 2008 or better

Browser Requirements

Microsoft Edge, Chrome
Acrobat Reader V8.00 or better (To view PO reports)
Every effort has been made to support other HTML5 browsers including Firefox, Safari. But only Edge and Chrome are fully tested for compatibility on each release.
