

Adopting AI-powered cloud technology

A small to medium-sized business (SMB) guide
to growing faster with Microsoft Dynamics 365
Business Central

Introduction

AI has become a fundamental tool in the way that people get their work done and how businesses find new ways to stay ahead of the competition. And while **71%** of small and medium-sized business (SMB) leaders believe that AI adoption is critical for their company to remain competitive, **61%** admit their company lacks a vision for AI implementation.¹

As the pace of business continues to increase, AI offers growing businesses the support to streamline manual processes, connect teams in a unified solution, and keep pace with evolving organisational needs.

For organisations to thrive in today's business landscape, they will need an AI-powered cloud-based business management solution that enables them to transform operations and connect their team in a single application.

1. "Workers worldwide are embracing AI, especially in small and medium-sized businesses," Microsoft, 2024.

The Power of AI in Business Central

Copilot and the agentic ecosystem

Realise more value with Copilot in Dynamics 365 Business Central

Whether your business is in the early stages of AI adoption or ready to further integrate AI into your company's processes, Business Central offers the AI capabilities to meet you at every AI maturity phase.

Copilot capabilities in Business Central offer three levels of AI capabilities to meet you where you are:

- **Copilot in Business Central:** Enhance personal productivity.
- **Agents:** Improve business productivity with prebuilt and custom agents.
- **Copilot extended:** Connect to the workflows and AI tools in the applications you use every day, and build synergies to save time and uncover new insights.

What Copilot in Business Central can do for you

The Copilot and agentic ecosystem is designed to get you started with AI and scale to meet your business needs.

Use Copilot in Business Central to:

Guide and explain concepts to help you learn new skills.

Find and locate records, pages, and matching products based on natural language inquiries or similar products.

Compare bank statements and incoming e-documents for reconciliation.

Analyse and organise data to help you get to insights faster.

Suggest numbering pattern setup for records and draft product descriptions.

Take automation further with agents built for Business Central.

Sales Order Taker*

- Communicates with customers.
- Interprets customer requests.
- Send quotes.

Payables Agent*

- Receives vendor invoices.
- Captures invoice information.
- Registers invoices according to company policy, preference, and history.

Any individual, regardless of skill level, can build their own agent to create automated workflows that enable them to work smarter.

Seamlessly connect Business Central and Microsoft 365 while harnessing the power of Copilot.

Collaborate in the apps you already use like Outlook, Excel, and Teams.

Stay in the flow of work by accessing the data in the tools you prefer without switching applications.

Work between apps with greater continuity guided by AI to get help drafting emails, summarizing information, and more.

Build your own agents in Microsoft Copilot Studio to optimise business processes and enhance productivity.

Dynamics 365 Business Central transition checklist

Nolan Business Solutions makes switching to Dynamics 365 Business Central easy.

Our expert guidance during the decision-making, planning, and execution stages of the cloud migration process not only minimizes potential downtime but also ensures your employees adapt to Dynamics 365 Business Central quickly and with ease.

Use this checklist to help plan for success:

☐ **Set up an initial consultation with Nolan.**

Our experts will meet with you to understand your challenges with your current finance system, discuss the long-term business goals you would like to achieve, and talk you through the options that are available to you.

☐ **Define and prioritise.**

Our experienced consultants will work closely with your leadership team and subject matter experts in key business processes to tailor your solution that meets your business needs and what benefits this will deliver, once it has been implemented.

☐ **Plan migration.**

We will create a comprehensive migration proposal that details what the solution will involve, outline key investment details and a guide which shows the implementation timeline and the resources required within your own business to successfully achieve your project goals.

☐ **Project management.**

Our dedicated project management team will work closely with you, your leadership and project team to ensure a successful implantation of the solution. The team at Nolan are always on hand to help with any queries you may have throughout the migration and beyond.

Take the next steps

The time to move to the cloud and embrace AI is now. To avoid falling behind in today's competitive business landscape, Nolan Business Solutions can guide you throughout the entire journey for a smooth transition and get the most out of Dynamics 365 Business Central with Copilot so you can:

Adapt faster

Transform business operations with the security, flexibility, and scalability of a Microsoft Cloud solution that grows with your business.

Work smarter

Empower people with Copilot capabilities and connectivity to Microsoft 365 so your team can be more productive, collaborative, and effective.

Perform better

Access guided workflows and timely data that drives continuous process optimization, accelerates financial close, and improves decision-making.
